Savitribai Phule Pune University

T.Y.B.C.A.

Semester – V

University Practical Examination Computer Laboratory on MJ-302-UIX : User Interface and User Experience (UI-UX) Desig$_n$

2024 Pattern as per NEP-2020

Academic Year: 2026-2027

Savitribai Phule Pune University
T.Y.B.C.A.(Management) Semester –V (NEP 2024 Pattern)
University Practical Examination Lab Course: (MJ304UIXP)
Computer Laboratory Based on User Interface and User Experience (UI-UX) Design
Time: - 1.5 Hours **Marks: -35**

Q.1 Create a storyboard showing how a student uses a university portal to log in, check attendance, view examination results, and download an academic document. Use simple sketches or digital illustrations and add short captions to explain each step. **[15 M]**

Q.2 Design a homepage for a college website or online bookstore. Apply suitable colors, typography, and Gestalt principles to make the page attractive and easy to navigate. Include a header, navigation menu, main banner, content sections, buttons, and footer. **[10 M]**

Q.3 Select a website that you find confusing or difficult to use. Identify at least three design problems and create an improved version using better layout, typography, spacing, and navigation. **[10 M]**

University Practical Examination Lab Course: (MJ304UIXP)
Computer Laboratory Based on User Interface and User Experience (UI-UX) Design
Time: - 1.5 Hours **Marks: -35**

Q.1 Choose a simple form, such as a student feedback form or contact form, and redesign it using the five basic UI/UX principles: consistency, feedback, simplicity, visibility, and accessibility. Explain how these principles make the form easier for users to understand and use. **[15 M]**

Q.2 Imagine a student ordering food through a food delivery app. Prepare an empathy map showing what the student says, thinks, does, and feels while using the app. Identify the problems the student may face and suggest ways to improve the experience. **[10 M]**

Q.3 Prepare a customer journey map showing how a student searches for a course, compares options, registers, and completes payment on an online learning platform. Identify the student's goals, feelings, and difficulties at each stage. **[10 M]**

Time: - 1.5 Hours **Marks: -35**

Q.1 Design a news webpage that works well on desktop, tablet, and mobile screens. Arrange the headlines, images, navigation menu, and other content so that the page adjusts to different screen sizes. Use readable fonts, suitable spacing, and flexible layouts to ensure a good user experience on all devices. **[15 M]**

Q.2 Using Figma, design the main screens of a shopping app and connect them to show how a customer completes a purchase. Create the following flow:

Home → Product Details → Cart → Payment → Order Confirmation

Add suitable buttons and use prototype interactions such as On Click → Navigate To to move from one screen to the next. **[10 M]**

Q.3 Create screens showing how a user requests a password reset, receives a verification code, creates a new password, and receives a success message. Connect the screens using prototype interactions. **[10 M]**
