WADHWANI FOUNDATION

Quton

We create customizable QR menus with interactive themes and silent staff alerts.

Sinhagad College of Commerce, saswad - bopdev - PuneRd, Yewalewadi

Context

Digital menus reduce ordering errors by 30–45% and cut wait times by 20%, by ordering from QR codes.

Problem Statement

Problem

traditional menus aren't bad but they can be better with the help of current technology and make the customer experience even better.

Impact

people take time adapting the new systems so having the physical menus as a option is best for catering to people of all ages and personal preferences

Problem Statement/Industry

WADHWANI FOUNDATION

Problem Being Solved

this startup solves the problem of having to print-reprint physical menus in restaurants and gives them a digital alternative for ordering food by scanning the QR code provided on the table and the menu can be updated in real time

Supporting Data

Digital menus reduce ordering errors by 30–45% and cut wait times by 20%, by ordering from QR codes.

Problem Analysis

WADHWANI FOUNDATION

Affected Stakeholders

the issue where shortage of staff or properly trained staff delay the customer's orders or dont attend to them when they need it, it solves the problem of calling a staff in the ambience of restaurant and gathering unwanted attention to the costomer which may result in bad impression on costomer's end, which isnt ideal for costomer satisfaction.

Impact on Stakeholders

if some staff assigned by the restaurant isnt paying attention to the customer's request after they've placed an order, because people just doesnt order one thing and sit still, they order miscellaneous things afterwards which could get unnoticed by the staff and cause bad impression on restaurant's end to fix that we presend digital menus

Root Causes

unanswered miscellaneous needs of customers which goes unnoticed by the staff which can be fixed by an online method of connecting with the customer which doesn't require much but just a QR code scan.

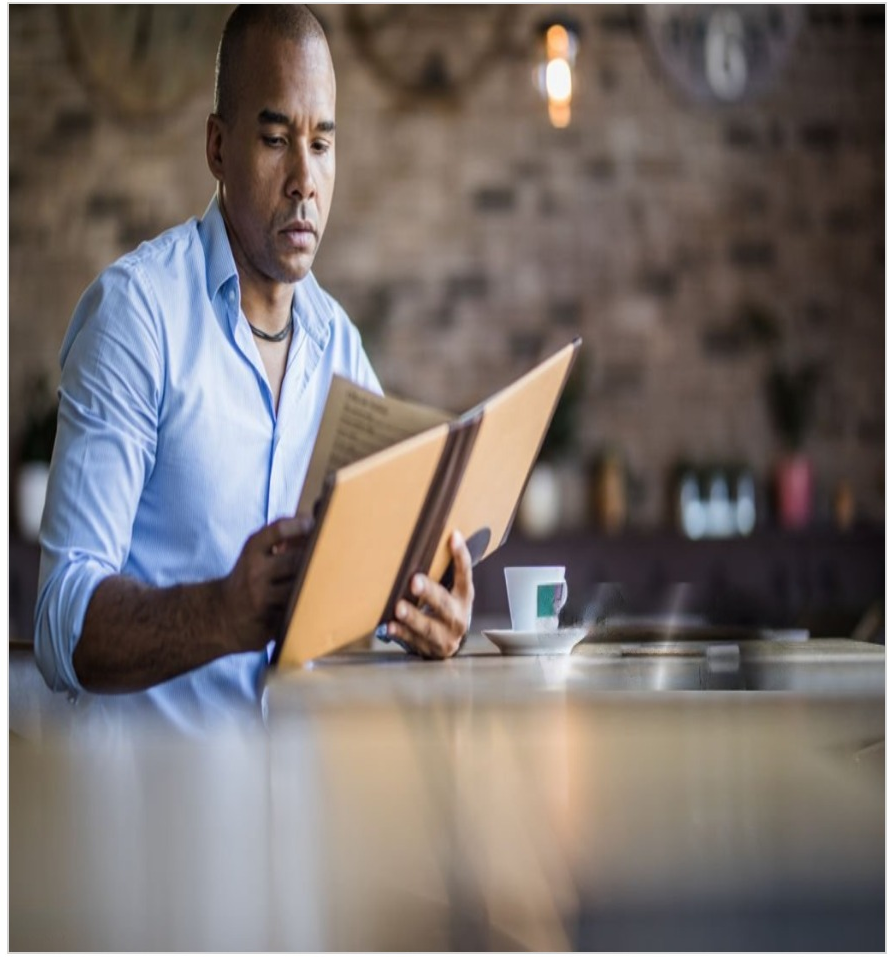

Personal/Team Connect

by making our menu systems online we fix a huge problem of causing disturbance to other people who are dining in the same restaurant as us, and this method makes it customer to staff contact seamless which further increases customer's trust and appreciation towards the place

Target Customer Segments

Primary

Mid-scale and premium urban dine-in restaurants.

Secondary

average working class

Customer Segment & Persona

Primary Segment

Primary Source of Information: Other

Shopping Preference: Mostly Online

Comfort with Technology: High

Favourite Social Media: discord, youtube

Favourite Offline Gathering Spots: garden, restaurants, malls

Jobs-to-be-Done

WADHWANI FOUNDATION

Functional JTBD

As an adult - gets his order placed without having to go through the hassle of calling the staff across the room.

Emotional JTBD

As an adult - his little demands like water bottle or some extra soup were delivered to him without any delay of information transfer through customer and staff.

Social JTBD

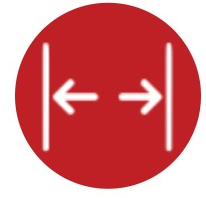

As an adult - he avoided disturbing other people's peace who came to dine there.

Current Alternatives

Current Alternatives

As an adult - his demands on the table are being catered on without any problem of communication with the staff.

Gaps in Current Alternatives

physical menus do not serve any purpose other then being there and assist the diner with the order and that's all there is, but digital menus can do so much more then just serve as a guide to the food menu, which is calling for staff for any kind of assistance around the order and much more.

Our Solution

Solution

Dynamic Theme-Adaptive Menus — Implement interactive QR menus with customizable visual themes tailored to diner preferences and venue ambiance, while enabling seamless, silent staff requests.

Core Technologies/ Methodologies

Built using React.js and Tailwind CSS (theming), Node.js with WebSockets (real-time staff alerts), PostgreSQL, and AWS.

Solution Design

WADHWANI FOUNDATION

Our Solution

Dynamic Theme-Adaptive Menus — Implement interactive QR menus with customizable visual themes tailored to diner preferences and venue ambiance, while enabling seamless, silent staff requests.

Key Features

Features include toggleable visual UI themes, silent staff alerts (for water, bill, etc.), real-time dish availability updates, allergen filtering, and mood-based menu recommendations.

Uniqueness

Proprietary dynamic theming engine paired with discrete one-tap staff paging, mood-curated food recommendations, and zero-app web accessibility via QR codes.

Solution Format:
Digital Service (Interactive QR Menu Platform)

Core Technologies/ Methodologies:
Built using React.js and Tailwind CSS (theming), Node.js with WebSockets (real-time staff alerts), PostgreSQL, and AWS.

Solution Benefits

WADHWANI FOUNDATION

Functional Benefits

Eliminate menu printing costs, update dish availability in real-time, instantly request staff without awkward waving, and safely filter menu items based on food allergies.

Emotional Benefits

Peace of mind regarding food allergies, relief from the social anxiety of flagging down busy staff, and delight in a personalized, modern dining experience.

Social Benefits

Enjoy uninterrupted conversations with dining companions without service disruptions, and impress peers or dates by effortlessly navigating a high-tech, premium dining vibe.

Macro Benefits

Eliminates paper and plastic waste from printed menus. It boosts restaurant economies through operational efficiency and protects public health by preventing severe food allergy emergencies.

Macro Analysis

WADHWANI FOUNDATION

Favourable Trends

AREA	DESCRIPTION
Climate/Environment	Rising eco-consciousness drives diners and eateries to cut paper waste via green digital menus.
Technology	Widespread smartphone and QR adoption makes app-free mobile menu browsing a daily diner habit.

Unfavourable Trends

AREA	DESCRIPTION
Social	Diners increasingly reject QR-only menus as impersonal, feeling they shift labor onto the customer.
Demographics	Older generations struggle with the tech gap of QR codes, risking alienating a key customer base.

Data Sources:

I based these trends on industry insights from the PYMNTS Intelligence and Paytronix "Digital Divide" report, as well as restaurant tech adoption data reported by Restaurant Dive and the National Rest

Back-of-the-Envelope Financial Projections

Currency: Indian Rupee (INR)

Chosen Business Model: Subscriptions

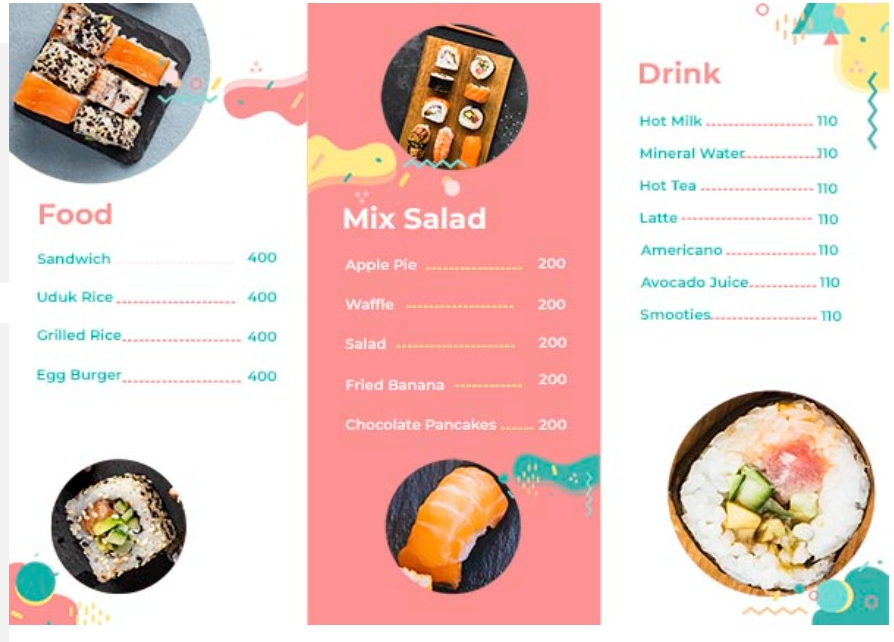

AREA	YEAR 1	YEAR 2	YEAR 3
Revenues	1200000	3600000	9000000
Total Expenses	2500000	3010000	4000000
Profit	-1300000	590000	5000000

Prototype

Prototype Format
An interactive web app prototype built in Figma to simulate the mobile browser experience.

Functionality included in the Prototype
The prototype includes QR scanning to access a theme-adaptive digital menu, a silent staff alert button for diners, and a restaurant dashboard for real-time menu updates.

Functionality NOT included in the Prototype
It will exclude live payment gateway integration, synchronization with existing restaurant POS systems, and advanced customer analytics to focus purely on the core menu experience.

Lean Canvas

WADHWANI FOUNDATION

Problem
traditional menus aren't bad but they can be better with the help of current technology and make the customer experience even better.

Solution
Dynamic Theme-Adaptive Menus — Implement interactive QR menus with customizable visual themes tailored to diner preferences and venue ambiance, while enabling seamless, silent staff requests.

Key Metric
Monthly Recurring Revenue (MRR), Restaurant Churn Rate, Customer Acquisition Cost (CAC), Daily QR Menu Scans, and Ad Click-Through Rates.

Unique value Proposition
Smart QR menus with silent staff alerts that eliminate restaurant printing costs.

Unfair Advantage
Proprietary theme-adaptive UI technology and high switching costs generated once restaurant waitstaff rely on our integrated silent alert system.

Channels
Direct – via our Quton web platform for self-serve onboarding. Field Sales – direct B2B outreach to restaurant owners.

Customer Segment
Mid-scale and premium urban dine-in restaurants.,average working class

Cost Structure

Platform development, cloud server infrastructure, core team salaries, and marketing materials (like physical NFC table standees) for customer acquisition.
